

MSDS 7330 File Organization and Database Management Homework Assignment 3

Create an ER model for modeling all the entities and the relations of the MSDS program. The model should account for the following

1. Capturing entities to hold the student info
2. Capturing entities to hold the instructor info
3. Relations to hold the associations between instructors, courses, sections and students
4. Additional information to model your previous classes and ongoing classes, model your payment /account information.

Create the ER model using MySQL workbench and submit the pdf file.

ER Model:
